

**Medical Equipment  
Electrical Safety testing  
and Performance  
Verification Service**

EIS provides biomedical testing, and onsite medical equipment performance verification service to medical centres, rest homes, dental practices, physiotherapists and any other businesses with biomedical devices throughout the wider Southland and Otago areas.

EIS test to the NZ standards AS/NZS 3551:2010. This standard requires medical equipment to undergo performance testing and electrical safety testing in accordance with the manufacturer's specifications.

EIS provides trained and skilled biomedical testing technicians who are familiar with the requirements of AS/NZS3551:2010 and they use state of the art testing equipment and software. Annual performance verification of medical equipment is a requirement for Cornerstone accreditation.

EIS believe in working with our customers to provide an efficient and timely service that causes minimal disruption to your practice.

Please contact EIS for more information or to book an appointment.
