

EIS provide electrical support via full time secondment to support our clients, reactive servicing and call outs, preventative maintenance, and predictive maintenance.

EIS provides a comprehensive service for electrical support for new and existing clients

Our services cover:

- Fulltime secondment to work directly with our clients
- Breakdown cover 24-7
- Planned work to keep plants overall equipment efficiency high.
- Predictive maintenance – predicting when parts will break using live data

EIS partners with clients who are concerned with minimising plant downtime and losses in production.

Our clients report average uptime improvements ~20% within 30-90 days after engagement.

EIS provides clients with bespoke solutions that increase their overall uptime. Unlike others in the market, we consult with a balance of cost, optimisation, and practicality in mind.
